SUMMARY

Detail-oriented Web Developer specializing in backend and full-stack development using PHP, MySQL, Python, and WordPress. Experienced in building dynamic web applications, customizing WordPress themes and plugins, and integrating databases with web systems. Strong understanding of secure authentication, CRUD operations, and system workflows.

WORK EXPERIENCE

Sacred Heart College of Lucena City, Inc. , Web Administrator/IT Support Staff **2022 - Present**

- Developed the new School Website for better experience of all the students, parents and stakeholders.
- Developed and maintained web-based systems using PHP, MySQL, and the Laravel framework, ensuring secure, scalable, and efficient application performance.
- Designed, developed, and managed the official school website using WordPress, focusing on usability, performance, and modern UI/UX standards.
- Led the transition from Elementor to Breakdance Builder, implementing a new WordPress page-building workflow to improve site speed, flexibility, and long-term maintainability.
- Customized WordPress themes, layouts, and components to meet institutional branding and functional requirements.
- Managed website content, updates, and optimizations to ensure consistent availability and performance.
- Collaborated with stakeholders to gather requirements and translate them into functional system and website features.

Freelance Graphic Designer & Web Developer **2022 - Present**

- Designed and developed custom websites and web applications using WordPress, PHP, MySQL, and Laravel, tailored to meet diverse client requirements.
- Created professional graphic designs including logos, branding materials, banners, social media assets, and marketing visuals for private clients across various industries.
- Delivered end-to-end design and development solutions, from concept and UI/UX design to deployment and maintenance.
- Successfully served and satisfied numerous private clients, building long-term relationships through clear communication, timely delivery, and high-quality output.
- Customized and optimized WordPress themes, page layouts, and builders to enhance performance, responsiveness, and visual appeal.
- Maintained and improved client websites with regular updates, security enhancements, and performance optimizations.
